Job details

Drone Pilots Needed for DJI Pilot 2 + SkyTrade Integration Testing (Hourly, Remote-Friendly)

Logistics & Supply Chain Management

Posted Apr 27, 2026

SkyTrade is testing the integration between DJI Pilot 2 and our drone monitoring application. We are looking for drone pilots who own a DJI drone compatible with DJI Pilot 2 to perform short test flights that connect their Pilot 2 app to our platform via DJI's Open Platform. This is a paid hourly engagement focused on testing - no production deliverables required, just reliable flying and clear feedback.

We expect to engage multiple pilots across different regions and drone models, so please apply even if you are only available for one or two sessions.

Scope of Work

- Connect your DJI Pilot 2 app to the SkyTrade platform using a short set of instructions we will provide (5 steps, takes a few minutes)
- Perform a short test flight (typical session 30–90 minutes including setup)
- Confirm that telemetry and live video appear correctly inside the SkyTrade application
- Capture screenshots/screen recordings of the Pilot 2 interface and the connection process
- Report any errors, glitches, or unexpected behavior in writing

Intermediate
Experience level

\$30.00 - \$50.00
Hourly range

Less than 30
hrs/week
Hourly

1-3 months
Duration

- Be available for follow-up sessions if we need to retest after fixes are deployed

Requirements

- A DJI drone compatible with DJI Pilot 2 (e.g. Mavic 3 Enterprise / Thermal / Multispectral, Matrice 30/30T, Matrice 300 RTK, Matrice 350 RTK, etc.)
- The latest version of DJI Pilot 2 installed on a supported remote controller
- Reliable internet connection at the flight site (Pilot 2 needs to reach the cloud during the session)
- Good written English for reporting test results

What to Include in Your Proposal

- Your DJI drone model(s) and remote controller model
- Your country/city and where you typically fly
- Your hourly rate (inclusive of drone use)
- Earliest date you can run a 1-hour test session

If you don't have a Pilot 2-compatible drone, please don't apply - the integration only works with that app [less](#)
