Worldwide

Summary

I am looking for a small company currently working on real embedded systems, preferably STM32-based or similar platforms.

This includes systems involving:

- * UART, SPI, I2C communication (driver-level)
- * Real-time operating systems such as FreeRTOS
- * Hardware/software integration and system-level debugging
- * Real-time behavior and communication protocols

Projects such as embedded control systems or complete solutions (e.g., access control systems integrating peripherals, communication interfaces, and PC interaction) are of particular interest.
